Nofi 2.0 collection carries on the design concept of Nofi series and it is a good application of textilene material as the main support of both seat and back, which is easy to maintain and clean. With padding in the middle, it offers no less comfort than cushions and makes people less concerned specially during rainy season.

An Urban-Nature chair, which combines technology and sensuality to honor an idea: that of sitting down to think, dream, speak... To be close to the sea and the city at once; It's a mix of emotions which takes you to other possible realities. A unique chair that is repeated endlessly to be shared with others. Its lightness, material and sensual and elegant shapes create a unique object for using inside or outside.

Airport collection is made of bend-extruded T Profile and corrugated sheet-metals (CSM) that was used by the Junkers Airplane Company of Dessau as the most suitable material to build the first and biggest fleet commercially-used planes. By adopting architectural proportions and elements, the 'Airport' outdoor collection can be imbedded in public environments as well as in private gardens and on the terraces.

Jumbo series represents an unhurried contemporary attitude towards leisure life. It looks like a jumbo item with "elephant ears" from a distance. Jumbo Lounge Armchair is wide with a handwoven backrest and wings, expressing a sense of embrace. The color of the wood and the combination of weaving make it very natural and harmonious. The thick seat and comfortable cushions can let a person rest on it all afternoon.
